

POWER TUBE

PROPOSAL

WHOLE HOME / OFFICE
ELECTRICITY BACKUP SOLUTIONS

We build energy storage solutions from e-waste (old laptop batteries). Globally, e-waste is consuming and destroying our precious land; and in Africa, reliable electricity is a challenge. We decided to do something about it! Power Tube is our first product, built completely from e-waste. Get up-to 10 kWh modular energy storage for your on-grid, off-grid and solar systems. And, YES, it's built from e-wastes!

PROPOSED BY
RECYCLED POWER

GET SMART BACKUP ELECTRICITY FOR **HOME & OFFICE**

Do you live or work in the dark? Secure your home from power outage with reliable backup power. Power Tube is able to detect a grid outage, disconnect from the grid and bring power back to your home or office in a fraction of a second. That is over 100x faster than typical standby generators, and fast enough to keep your appliances running without interruption. Nothing goes off.

KEY FEATURES

Silent | Auto-Detect Power Outage & Switch | No Fumes or Gases | 2 Years Warranty | Hands-Free | Compatible with Solar | Low-Voltage & High-Voltage Protection | UPS Feature | Compatible with High Current Appliances (E.G. Microwaves, Irons, Air-Conditioners)
